

- Service Area:** Aboriginal Community Engagement, Public Participation and Facilitation
- Project:** Aboriginal Consulting Program For The Development of 500kV, 240kV and 138kV Transmission Line Projects
- Client:** AltaLink Management Ltd., B.C. Hydro, Epcor
- Location:** Alberta and British Columbia, Canada

The **human environment group (HEG)** has designed and carried out numerous Aboriginal consultation programs for 500 kV, 240 kV and 138 kV transmission lines and substation development throughout Alberta and British Columbia.

This has involved extensive travel to local communities for one-on-one meetings and community open houses, focus groups and community tours of Project areas

Project deliverables have included aboriginal Consultation Plans, resource materials (e.g. presentations, project information letters, updates, etc.) and the development of a database for tracking concerns and follow-up commitments for each First Nation. The process has also involved writing portions of utility applications for government regulatory approvals.
